EDUCATION

Embry-Riddle Aeronautical University

Bachelor of Science in Computer Science, Cybersecurity Engineering Concentration

Dean's List

Daytona Beach, FL

Graduated 2025

3.62 GPA

WORK EXPERIENCE

Software Engineer, Flight Simulation Labs

The Boeing Company

July 2025 - Present

St. Louis, MO

- Creating software for Flight Simulation Labs supporting flight simulators used in pilot training
- Responsible for designing, implementing, testing, and documenting software in collaboration with a scrum team
- Maintain and update software across functional teams to support new product releases and capabilities

Technical Standards Developer

Keysight Technologies

October 2024 - June 2025

Remote

- Represented Keysight Technologies at the US Cyber Trust Mark technical requirements committee meeting
- Developed and published the technical standard ANSI/CTA-2119 with a multidisciplinary working group
- Created the first draft of ANSI/CTA-2133 and developed it into a published standard with a group of experts

Research and Development Intern

Keysight Technologies

May 2024 - August 2024

Remote

- Designed and developed software concepts to evaluate documents against given requirements using an LLM
- Lead development on an internal tool to generate software boilerplate, saving valuable development time

Cybersecurity Engineering Lab Manager

Embry-Riddle Aeronautical University

January 2024 - May 2025

Daytona Beach, FL

- Maintained and configured an air-gapped attack and defense laboratory for instructional and research use
- Managed diverse virtual machines for graduate classes and Capture The Flag (CTF) competitions
- Created a scoreboard website that integrates with a database and scoring engine for an in-house CTF

PROJECTS

VANTAGE Senior Design Project | 4-person team | *Python, Julia, Git, Scrum, Jira* August 2024 - May 2025

- Document and design a simulation environment for autonomous Uncrewed Aerial Systems research
- Integrate multiple dependencies using Python and Julia for a cohesive user experience across a UI and API
- Created documentation and shell scripts to assist with software installation

AES-256 Implementation | 2-person team | *Rust, Test-Driven Development, Git, Scrum* March 2023

- Developed decryption and key expansion code based on technical specifications such as FIPS 197
- Followed Test-Driven Development principles by writing unit tests for each encryption and decryption step
- Planned division of labor and led scrum meetings to discuss sprint progress

FitSage Fitness App | 4-person team | *Dart, Flutter, SQL, Git, Scrum* January - May 2023

- Developed a mobile app for fitness management with OCR functionality for scanning Nutrition Facts labels
- Wrote detailed documentation before development to assist the team and refine the application design
- Implemented UI views based on wireframes, concept art, and documentation to meet the software requirements

TECHNICAL SKILLS

Languages: Rust, C++, Java, C, Go, Python, Julia, JavaScript, SQL, HTML, CSS, Dart, Gleam, Bash, TLA+

Frameworks: GTest, Flutter, Django, Tauri, Dioxus, Metasploit

Operating Systems: Linux (Debian-based, RHEL-based, Gentoo, Arch), MacOS, Windows

Developer Tools: Git, GitHub Actions, BitBucket, GitLab, JIRA, Visual Studio, Confluence Markdown, LaTeX

IT Skills: VMware ESXi/Vsphere, Microsoft Active Directory, Shell competence, Wireshark, Nmap, OSI Model

Natural Languages: English (Native Proficiency), Spanish (Working Proficiency Reading-Writing)

Honors: ACMSE Programming Competition Second Place (2024), Dean's List, CyberPatriot First in State (2019)

Organizations and Clubs: ACM, IEEE, WIKD 102.5 Radio Station
